

## MASTER GEOMETRY

| Source              | Size           |
|---------------------|----------------|
| Source QSFP 25.7    | 25.7 x 12.9 mm |
| Source QSFP 29.6    | 29.6 x 13.2 mm |
| Innolight QSFP 28.7 | 28.8 x 15.2 mm |
| QSFP-DD SR4 root    | 30.2 x 15.6 mm |
| QSFP56 200G FR4     | 25.8 x 13.9 mm |

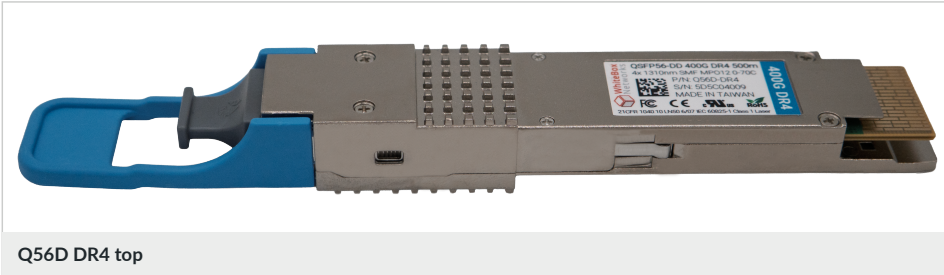

## PRODUCTION READ

Selected masters come from current Source Photonics and Innolight families plus the newest root QSFP-DD file.

The purple dashed printer cut path is treated as non-artwork and stripped from previews.

WBN keeps the proven anatomy: vertical brand rail, speed/reach strip, QR/serial block, compliance row.

## RENDERED WBN LABEL MASTERS

## WBN REFINEMENTS

**KEEP**

Compact physical proportions; compliance row; machine-readable QR/serial block; speed/reach strip.

**IMPROVE**

Use WBN coral only as rail/accent, tighten type scale, keep SKU readable on installed modules.

**AVOID**

Marketing claims, big decorative marks, fake 3D label renders, or labels that depend on color alone.
